

## A. Learning Languages

time limit per test: 2 seconds  
memory limit per test: 256 megabytes

The "BerCorp" company has got  $n$  employees. These employees can use  $m$  approved official languages for the formal correspondence. The languages are numbered with integers from 1 to  $m$ . For each employee we have the list of languages, which he knows. This list could be empty, i. e. an employee may know no official languages. But the employees are willing to learn any number of official languages, as long as the company pays their lessons. A study course in one language for one employee costs 1 berdollar.

Find the minimum sum of money the company needs to spend so as any employee could correspond to any other one (their correspondence can be indirect, i. e. other employees can help out translating).

### Input

The first line contains two integers  $n$  and  $m$  ( $2 \leq n, m \leq 100$ ) — the number of employees and the number of languages.

Then  $n$  lines follow — each employee's language list. At the beginning of the  $i$ -th line is integer  $k_i$  ( $0 \leq k_i \leq m$ ) — the number of languages the  $i$ -th employee knows. Next, the  $i$ -th line contains  $k_i$  integers —  $a_{ij}$  ( $1 \leq a_{ij} \leq m$ ) — the identifiers of languages the  $i$ -th employee knows. It is guaranteed that all the identifiers in one list are distinct. Note that an employee may know zero languages.

The numbers in the lines are separated by single spaces.

### Output

Print a single integer — the minimum amount of money to pay so that in the end every employee could write a letter to every other one (other employees can help out translating).

### Examples

|  |      |
|--|------|
| input  | Copy |
| 5 5<br>1 2<br>2 2 3<br>2 3 4<br>2 4 5<br>1 5 |      |
| output                                       | Copy |
| 0  |      |

|   |      |
|---|------|
| input   | Copy |
| 8 7<br>0<br>3 1 2 3<br>1 1<br>2 5 4<br>2 6 7<br>1 3<br>2 7 4<br>1 1 |      |
| output  | Copy |
| 2   |      |

|                 |      |
|-----------------|------|
| input           | Copy |
| 2 2<br>1 2<br>0 |      |
| output          | Copy |
| 1               |      |

### Note

In the second sample the employee 1 can learn language 2, and employee 8 can learn language 4.

In the third sample employee 2 must learn language 2.

### → Attention

The package for this problem was not updated by the problem writer or Codeforces administration after we've upgraded the judging servers. To adjust the time limit constraint, a solution execution time will be multiplied by 2. For example, if your solution works for 400 ms on judging servers, then the value 800 ms will be displayed and used to determine the verdict.
