Problem Statement

You are given an integer sequence $a_0, a_1, \dots, a_{N-1}$ with the length N . Process the following Q queries in order:

- $l\ r$: Print the number of distinct integers that occur in $a_l, a_{l+1}, \dots, a_{r-1}$.

Constraints

- $0 \leq N \leq 5 \times 10^5$
- $0 \leq Q \leq 5 \times 10^5$
- $0 \leq a_i \leq 10^9$
- $0 \leq l \leq r \leq N$

Input

```
N Q
a_0 a_1 \cdots a_{N-1}
l_0 r_0
l_1 r_1
\vdots
l_{Q-1} r_{Q-1}
```

Sample

#1

```
5 3
3 7 1 2 1
1 5
3 3
0 4

3
0
4
```
